

## Staking Tech A

South Central Indiana REMC (SCI REMC) is a not-for-profit electric distribution, member-owned cooperative. The cooperative is a technology leader in electric distribution systems and is headquartered in a new and progressive facility in Martinsville, Indiana. SCI REMC serves seven counties including Morgan, Monroe, Owen, Brown, Johnson, Putnam and Clay with over 3,542 miles of energized lines and 33,549 meters serving 28,007 members. SCI REMC is excited to add a fiber division and bring broadband services to its members' homes and businesses.

*SCIREMC is a trusted electric cooperative serving our diverse communities with innovative energy solutions and life-enhancing services.*

The Staking Tech A is a technician who prepares the plans for new and/or existing electrical services. The position is under the general supervision of the Sr Manager of Engineering and Operations Technology.

The main responsibilities include:

- Being responsible for the staking functions and inspection of new and/or existing single phase and three-phase electric service as requested by members and system improvements as assigned;
- Providing engineering recommendations based upon current NESC and NEC standards to fellow employees and members.
- Using opportunities to develop member support, understanding, and acceptance of the Engineering Department activities as they pertain to membership.

**If you are Interested in this great opportunity and meet the qualifications below, apply confidentially through the SCI REMC website – [www.sciremc.com/careers](http://www.sciremc.com/careers)**

SCI REMC offers excellent benefits including a pension plan, 401(k) matched savings, healthcare, HSA with a generous employer contribution and much more. Joining the co-op family will prove to be a welcoming, friendly experience where employees are focused on providing the best service to all members and subscribers. Join this unique, not-for-profit business that truly values employees and encourages life-long learning and development.

### **EDUCATION:**

- Two years of college or technical school in electrical or electronics engineering, or completion of an approved apprenticeship program and attainment of Journeyman Lineman status.

### **EXPERIENCE:**

- Minimum of three years' experience in a public contact position with related job duties, such as engineering, electrical, survey, or journeyman lineman experience.

### **POSITION QUALIFICATIONS:**

- Must have the ability to design requested services and to prepare staking sheets and material sheets for work orders, based on a review of the Service Order Request and a field inspection of the site.
- Must have the ability to estimate the cost of a new service to the consumer and to the Cooperative.
- Must have the ability to operate a personal computer to obtain and analyze customer information using engineering and mapping software.

- Familiarity with NEC and NESC, preferred.
- Must be capable of communicating actively with management, employees, members, personnel from other organizations and the general public.

**PERSONAL QUALIFICATIONS:**

- Must be able to work effectively on a daily basis with a variety of individuals.
- Must be regular in work attendance.
- Must have a valid driver's license.
